RAILWAY

LEMAN offers railway as an alternative transport mode, as an intermediate solution between Air and Sea freight. Railway represents an interesting alternative, as it is more cost effective than Air and has shorter transit times than Sea. Railway is also a great alternative when caring for the environment. 3 different corridors connect several major European markets with China.

Rail transport between China and 60 different countries is growing, and it is expected that the number of trains will be doubled within the next decade. Significant Chinese investments help push this development forward.

Our worldwide agent network and local expertise will help you with the precise conditions that apply to your needs, and a LEMAN contact person will be assigned to you. LEMAN is your railway partner.

FACTS & ADVANTAGES:

- Competitive rates & fixed allocation from all Chain hubs
